

Kalypso's team of functional and technical FlexPLM experts delivers value through proven solutions and methodologies supporting rapid scaling from foundational to advanced capabilities.

Indicators of PLM Shortcomings

Frustrated and dissatisfied users	Broken digital thread
Siloed, disconnected data	Heavily manual processes
Lack of analytics to enable decision making	Insufficient traceability/transparency

Our Offerings

Pre-Configured Enhancements	Rapid Implementation
Industry Leading Practices	Co-Development Opportunities
Hardlines, Soft Goods, Footwear	Global Resources

Advance PLM capabilities, connectivity and support of product E2E and digital workflow.

Six Key Offerings to Advance Your PLM Experience

Pre-Configured Enhancements

Pre-configured, RFA-specific solution complements FlexPLM with capabilities helping to improve business efficiencies and adoption

Accelerate product development and user engagement with proven capabilities

Co-Development Opportunities

Identify an enhancement opportunity and partner with us to co-develop and deploy into your environment

Expand PLM capabilities and industry influence

Rapid Implementation

Proven Delivery Model based on decades of experience with FlexPLM implementations, upgrades and enhancements

Speed to value with reliable, scalable deployments

Hardlines, Soft Goods, Footwear

Solutions and practices support all RFA product types, related data and variations

Efficiencies from standardized support of all product lines and types

Industry Leading Practices

Woven through the Accel solution and Delivery Model, leading practices support optimized processes and solutions

Operational efficiencies driven from leading process and technical practices

Global Resources

Experienced, trained and geographically diverse resources serve as trusted advisors and delivery consultants

Client support in locations and times needed

Expected Results

- ✓ Express time-to-value with low to no customizations
- ✓ Adopted industry leading practices
- ✓ Enabled E2E product connection from Planning to Selling
- ✓ Connected digital thread
- ✓ AI-ML-enabled analytics
- ✓ Fulfilled consumer and regulatory demand for transparency and traceability
